5. Acesonic KOD-6822 Karaoke Jukebox Main Menu

Once you begin the Acesonic karaoke player, you will see above screen. Click on anywhere to operate the machine.

Below is explanation of each function:

- **SEARCH** – This is the general search area. Once you enter, you can search for a song either by song title or artist. All you do just enter a partial word of the title, the smart search will find all results containing your words.
- **LANGUAGE** – This function is for you to search for a song by its language. If your jukebox contains music with multiple languages, you can enter “Language” and select a language shown on the screen, and then you may search for all songs that are only in the language of your choice.
- **TYPE** – This function allows your search by music genre. Most music is set to one of the 10 genres. You will go into “Type” and a list of genres will show on the top bar, press one of the genre to see a list of music in that genre.

- **FAVORIATE** – This is where you can find your songs quickly that has been set to “My Favorite’.
- **PREVIEW SCREEN** – Preview screen is for you to see what is playing on the TV. The preview screen is mirror the HDMI out so you can look at the preview screen to quickly see what’s playing on your TV.
- **ARTIST** – This is where you can search a song by artist name. If you enter the “Artist” tap, you will see all artist pictures shown on the screen. You can further refine your search result if you can tap “Male”, “Female” or “Band” on top of the screen to narrow.
- **NUMBER** – This is where you can find a song by enter its song number found in the song book. If you have a song book on hand, you can go to “Number” button and a 10-digits keyboard will be shown on the screen for you to enter the 6 digits song number of the song that is shown in the song book.
- **RANKING** - The ranking button allow you to see all songs ever been played on this machine sorted by its popularity. This is a good place for you to see what songs are popular and it is easy for you to choose your next song.
- **YOUTUBE** – This function is where you will be able to play all YouTube video links added to the player’s song list. You will first need to add your Youtube link to the song database. Once you have done so, you can select any of the songs shown in the YouTube link video and stream these songs to your player.
- **SETTINGS** – Setting is where you can make adjustment on player default functions.

6. How to Search Songs by Artist Icon

Search by Artist function is for you to browse through thousands of artist icon and search for the song that is known to be perform by this artist.

On top of the navigator bar, if you know the artists you are looking for, you can narrow the search result being displayed in the artist icon box. Default is set to “All”; however, you can select by “Male”, “Female” or “All Bands”, or “Western Male”, or “Western Female” or “Western Band” to further narrow your results.

If you look at the right keyboard display box, you can also further narrow your search result by enter a few letters using the following way:

- 1) For artist name has only one word, you can enter the entire word such as “Madonna” which it will show Madonna’s picture icon in the artist picture box.
- 2) For artist name with two words, you can enter the initial letter such as “MJ” for Michael Jackson. You maybe also enter “Michael J” and you will also be able to find artist “Michael Jackson” in the result box.
- 3) For artist name with 3 or more words, you can just enter the initial letter of each word, such as “3DD” for artist name “3 Doors Down”

7. The Initial Letter Search Method

Initial letter search is the most common and easiest method of search for any song title or artist name for KOD-6822 Karaoke Player. Every song title and artist name are been indexed by its letter initial (English word is first letter of each word, Chinese character is it's first letter of Pinyin of each word)

For Example:

If you want to find a song called: **We Will Change The Running Flow** You'll enter **WWCTRF**

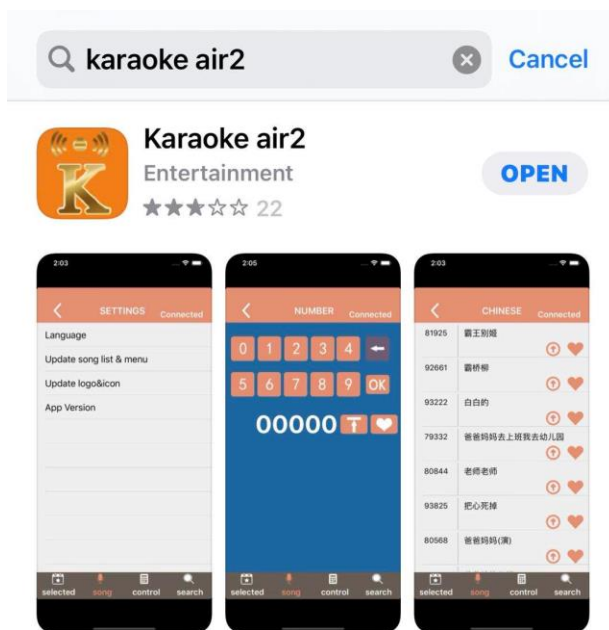

Finding an artist name, you can spell out its name or input its initial letter. For example: If you want to find the artist "Michael Jackson", you can input the following ways: "MJ", "Michael J", "Jackson", "Michael Jackson", any of these methods you will able to find Michael Jackson in the search box. Anytime if you are search any song or title in the karaoke player, you can enter the initial letters of the song or title to shorten your search effort.

8. How to control KOD-6822 Karaoke Player using iPad / iPhone

You can control the entire player's function from your Ipad / iPhone /Android Phone or Android Tablet

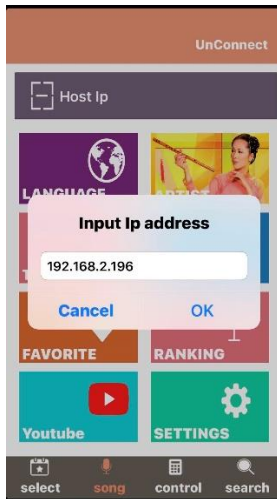

For Android App download please go to: <https://www.acekaraoke.com/hacepl6822.html>

First, on your IOS device, you must download from Apple App Store called "Karaoke Air2"

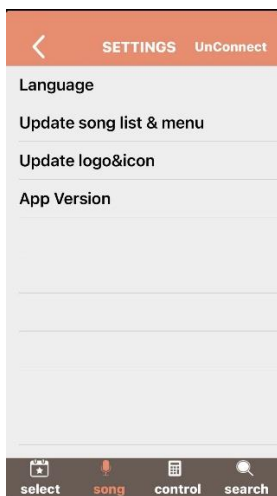

Once you downloaded the app, you'll need to connect the IOS App to your KOD-6822 using following steps:

- 1) Make sure your IOS and the Karaoke Player are connected to the same network
- 2) Tap "Host IP" on your IOS App, and input your Karaoke Player's IP address

- 3) The IP address of the player is found under the “Setting” screen on your karaoke player.
- 4) If your IOS App found the Karaoke Player, the top of the screen will show “Connected”
- 5) Now you have to download the entire song database and artist icons to your IOS device: Clock on “Settings” on your IOS Device and you will see the screen below:

- First click on “Update song list & menu”. Your IOS device will begin download all of the song information to your IOS device. This process shall take 3-5 minutes.
 - Once it is finished, click on “Update logo & Icon” This process again will take 3-5 minutes.
 - After both steps are finished, you don’t need to download again in the future until you have added more new songs to your karaoke player or you are connecting to a difference device.
- 6) Now you can begin to search for songs in the karaoke player using your IOS device.
 - 7) The easiest way to search for any song is click on “Search” function on the bottom right corner. The search function allows you to search by either artist name or song title. If

you can input (by typing, by hand writing or speaking) any artist name or song title into your IOS device, the result will show up on in the search box.
